## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the product applying a magnetic field with certain magnetic flux density, does not reasonably provide enablement for other than those exemplified in the specification. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The present product comprises a liquid crystal composition containing liquid crystal polymer, which polymer has orientation degree between 0.5 and 1.0 (functional language). The claims are broader than the enabling disclosure. The claimed invention is not supported by examples commensurate in scope. There are no teachings how to make and/or select the liquid crystal polymer from the enormous known polymers in the art except those exemplified in the specification. LC is an unpredictable art. Without knowledge of the properties of liquid crystal polymers under proper condition (the magnetic flux density) commensurate in scope with the claims, Applicants invite the skilled artisan to first synthesize and then test the species before a use can be undue. For examples, Examples 1-3 have the mold product comprising the same liquid crystal polymer as Comparative Examples 1-2. The Examples 4-5 and Comparative Example 3 also have same polymer. The only difference between these products is applying different magnetic field (see Table 1 on page 25 in the present specification). Also see Table 2 on page 28 for the comparison.

2. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

3. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The

examiner can normally be reached on 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications
